

Entity	Products Regulated	Product Description	Definitions	Source
FDA	Human Foods	Foods for human consumption, including dietary supplements, and color additive	Imported food	https://www.fda.gov/ForIndustry/ImportProgram/ImportBasics/RegulatedProducts/default.htm
	Human Drugs	Active pharmaceutical ingredients and both prescription and over-the-counter medications	Articles intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease and articles (other than food) intended to affect the structure or any function of the body of man or other animals. Therefore, almost any ingested or topical or injectable product that, through its label or labeling (including internet websites, promotional pamphlets, and other marketing material), is claimed to be beneficial for such uses will be regulated by FDA as a drug. The definition also includes components of drugs, such as active pharmaceutical ingredients.	
	Vaccine, Blood, and Biologics	Biologic products such as human blood, blood donor screening tests, human tissue, embryos, human plasma, and medical devices for use in blood banking operations	Biological products, including blood and blood products, vaccines, allergenic, gene therapies and xenotransplantation. Human cells and tissue products (HCT/Ps) that are intended for implantation, transplantation, infusion, or transfer into a human recipient. This may include bone, ligament, skin, dura mater, heart valve, cornea, hematopoietic stem/progenitor cells derived from peripheral and cord blood, manipulated autologous chondrocytes, epithelial cells on a synthetic matrix, and semen or other reproductive tissue. Medical devices involved in the collection, processing, testing, screening, manufacture and administration of blood, blood components, and human tissue and cellular products. HIV test kits used to screen donor blood, blood components and tissue and cellular products (HCT/Ps), and products used to diagnose, treat, and monitor persons with HIV and AIDS. Certain drug products, including blood bags with anti-coagulant	
	Medical Devices	Medical devices such as first aid kits, pacemakers, and surgical instruments	An instrument, apparatus, implement, machine, contrivance, implant, in vitro reagent, or other similar or related article, including a component part or accessory which is: recognized in the official National Formulary, or the United States Pharmacopoeia, or any supplement to them, intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease, in man or other animals, or intended to affect the structure or any function of the body of man or other animals, and which does not achieve its primary intended purposes through chemical action within or on the body of man or other animals and which is not dependent upon being metabolized for the achievement of any of its primary intended purposes."	
	Radiation-Emitting Electronic Products	Radiation-emitting products such as x-ray machines, microwave ovens, CD-ROMs, suntan beds, police radars, metal detectors, security systems, cell phones, laser gunsight, and laser pointers	Any electrically-powered product that can emit any form of radiation on the electromagnetic spectrum. These include a variety of medical and non-medical products such as mammography devices, magnetic resonance imaging (MRI) devices, laser toys, laser pointers, liquid crystal displays (LCDs), and light emitting diodes (LEDs)	https://www.fda.gov/downloads/Radiation-EmittingProducts/RadiationEmittingProductsandProcedures/UCM183653.pdf
	Cosmetics	Cosmetic products such as shampoo, make-up, and face creams	Products (excluding pure soap) intended to be applied to the human body for cleansing, beautifying, promoting attractiveness, or altering the appearance.	
	Animal and Veterinary	Animal food and feed as well as veterinary medicines	Animal food and feed, pet food, animal drugs, medicated feed, and veterinary devices.	
	Tobacco Products	FDA-regulated tobacco products such as cigarettes, smokeless tobacco, and roll-your-own tobacco	Any product made or derived from tobacco that is intended for human consumption, including any component, part, or accessory of a tobacco product (except for raw materials other than tobacco used in manufacturing a component, part, or accessory of a tobacco product).	
Georgia DOA	Pesticides	Any substance or mixture of substances intended for preventing, destroying, or repelling any pest or pests. This definition includes herbicides, insecticides, antimicrobials, plant growth regulators, defoliant, etc.	EPA regulates the contents of the product, but Ag regulates the usage of the product.	

	Livestock and Poultry	Regulates sales of livestock and poultry		
	Retail Food	The Retail Food Section is responsible for enforcing state laws, rules and regulations by conducting sanitation inspections of retail food stores. Regulated firms include grocery stores, convenience stores, bakeries, seafood operations, salvage food operations, mobile meat trucks and rolling stores to ensure Good Retail Practices (GRP's) are being followed and the wholesomeness of food is maintained. The retail food safety inspectors, or compliance specialists, conduct random and unannounced inspections of food sales establishments that are licensed by the GDA.		
	Meat Inspection	Red meat slaughter and processing		
	Weights and Measures	Verifies accuracy for commercial transactions		
	Motor Fuels	Regulates quantity and quality		
	Agricultural Products	All Georgia grown agricultural products but Vidalia onions, grains, corn, and tobacco have specialty programs.		
	Manufactured Foods	Inspects processing and distribution of seafood products, food manufacturing facilities, processing plants, wholesale bakeries, bottled water, and food processors.		
	Fertilizer and Feed	Regulates registration of use, labeling, product sampling, quality standards, and tonnage.		
	Seed	Regulates licenses for dealers.		
	Animals	Governs the prevention, control and eradication of certain infectious and communicable diseases of livestock and other domestic animals as well as provides registration and health guidelines for certain domestic animals.		
USDA	Human Foods	Any product intended for human consumption, wholly or in part, from the carcass or parts of any cattle, sheep, swine, and goat," per the Federal Meat Inspection Act; this does not include nonamenable species (bison, domestic rabbits, domestic deer, pheasant, quail, waterfowl, etc.) unless they voluntarily agree to inspection.	USDA tracks animal health and welfare issues as they relate to food safety and the production and availability of animals for processing into meat.	
	Veterinary biologics	Including vaccines, bacterins, antisera, diagnostic kits, products of biological origin; centered around the Virus Serum Toxin Act		
	Biotech Plants	Genetically engineered plants	Within USDA, the Animal and Plant Health Inspection Service (APHIS) is responsible for protecting agriculture from pests and diseases. Under the Plant Protection Act, USDA-APHIS has regulatory oversight over products of modern biotechnology that could pose such a risk. Accordingly, USDA-APHIS regulates organisms and products that are known or suspected to be plant pests or to pose a plant pest risk, including those that have been altered or produced through genetic engineering.	
	Plants	Agricultural	Safeguards U.S. agriculture and natural resources against the entry, establishment, and spread of economically and environmentally significant pests, and facilitates the safe trade of agricultural products.	

	Animals	Regulates licensing for certain commercial animal dealers including research facilities, transporters (trucking companies and airplanes), and exhibitors.	Include circuses, zoos, educational displays, petting farms/zoos, animal acts, wildlife parks, marine mammal parks, and some sanctuaries. The animals involved in the exhibition may include domestic and exotic animal species. Research facilities include hospitals, colleges and universities, and pharmaceutical firms.
	Organic Products	Regulates which products can use organic seal based on their policies and regulations.
