HELP US HELP CHILDREN WITH CEREBRAL PALSY

*Take part in a new research study
using vibration to improve strength
and physical activity.*

Do you have a child with cerebral palsy who can walk without a walker or cane and is between 5 and 11 years old?

If you do, your child may be eligible for our 12-month study (56-hour total commitment). We want to see if standing on a gently vibrating platform for 10 minutes a day can improve muscle function and balance, as well as increase physical activity in children with cerebral palsy.

Your child will receive up to \$385 for participating. Parents will be reimbursed for travel expenses. *This study is sponsored by the University of Georgia.*

Principal investigator: Christopher Modlesky, Ph.D.
