9:00 – 9:50 am: Exercise and Eye Disease: Dr. Mike Cymbor
10:00 – 11:50 am: Diagnosis and Management of Intraocular Tumors: Chris Bergstrom

Dr. Areiel Cerenzie is a West Texas native that fell in love with North Carolina and decided to make it home. She received her Bachelor of Science from Texas A&M University & her Doctor of Optometry from the University of Houston College of Optometry. She then completed a cornea and contact lens residency at the University of Missouri-St. Louis. To further her training, Dr. Cerenzie earned fellowships in the American Academy of Optometry (FAAO) and the Scleral Lens Education Society (FSLs). She is a member of the American Academy of Orthokeratology and Myopia Control and the National Keratoconus Foundation. She frequently publishes and lectures on myopia management and specialty contact lenses to doctors across the country.

Dr. Mike Cymbor is a dynamic and engaging clinician/speaker. He lectures frequently on the topics of glaucoma, optical coherence tomography, and electroretinography. He also has an interest in diabetic retinopathy, macular degeneration, dry eye and ocular surface disease. He is a leader in the eyecare sustainability movement. He lives with his wife Autumn and has three kids. He loves being a husband and a father. He bikes, swims, runs, hikes, plays basketball and generally prefers to be in motion.

Dr. Chris Bergstrom was born and raised in Kansas. After completing his bachelor's degree at Southwestern College he received a doctor of optometry degree from the University of Houston College of Optometry. After a short career as an optometrist he returned to school and received his medical degree from the University of Kansas School of Medicine. He did a transitional internship at The Medical Center in Columbus, GA. Dr. Bergstrom completed his residency in ophthalmology at Emory University serving as chief resident his final year. He stayed at Emory for two years of subspecialty training in retina/vitreous and oncology. After his training, Dr. Bergstrom remained on staff at Emory University taking care of adult patients with retinal diseases and intraocular tumors. He has extensive experience treating and managing patients with intraocular melanoma. During his career at Emory, he was involved in several clinical trials, given numerous lectures, and has several publications in the literature. He is a member of the American Academy of Ophthalmology and International Society of Ocular Oncology. Dr. Bergstrom and his wife have three daughters. They all enjoy boating, water sports, exercising, and traveling.
